

My experience with Dr. White and his entire staff FAR exceeded my expectations both results-wise and care-wise. When I first realized how much I wanted to improve my quickly aging face and skin, I was quite overwhelmed with the multiple and various options available in the marketplace. I was seeking the most effective treatment that would have the longest lasting results. I had done a lot of research and had multiple appointments with numerous skin care people, dermatologists, and plastic surgeons.

Upon my first visit with Dr. White and his staff, they immediately made me feel at ease, comfortable and were all extremely knowledgeable. They helped to identify just what I was looking for. The time and preparation they devoted to me prior to surgery was phenomenal. Everything from what to expect and how to prepare was thoroughly discussed. Even afterwards when I had more questions they always returned my calls in a timely manner.

Dr. White's skill is amazing! Within just 2 weeks I had people and family commenting on how much younger and thinner I looked. My son told me I looked the way I used to; which confirmed to me the results were not only noticeable, but natural too!

The nursing and staff care didn't end the day of my surgery. They continued to follow up and answer any additional questions I had not only knowledgeably but joyfully.

Dr. White's follow up visits were always very helpful too. Any concerns or questions I had were answered thoroughly and with confidence that he was willing to do what it took to ensure I was very satisfied with my results.

In summary: I would do it all again, am thrilled with my results and would highly recommend Dr. White and his entire staff to anyone looking for a great experience in skin care or surgery. They will make you feel like you are the only patient in the world!
