

PRO LIPO™ - by Steven K. White Sr., M.D.

Laser body contouring is now available at the beach appropriately performed by a **board-certified plastic surgeon** in a **certified plastic surgery center**. This advanced technique, delivered through the technology of Sciton Laser, gives you fat reduction with quick results and minimal down time.

**Pro Lipo™** delivers laser energy through a slender fiber directly to areas of body fat. That, in combination with ultra sonic lipo, conventional vacuum lipo and toumey lipo, a patient has available all the most up to date state of the art equipment to deliver the most optional results performed by a board certified surgeon.

With this technique, usually only one treatment is required. Results are best achieved at the end of three months, but patients see a dramatic improvement very early on. Other methods mentioned can also be used for large volume lipo suction.

With **Pro Lipo™** there is typically faster recovery, shorter down time, less bruising, and much less pain. This technique tightens skin and in combination with ultra sonic lipo, the results can be phenomenal. Many times this is done under local anesthesia, but patients have the option of choosing other forms of anesthesia because these procedures are performed at a certified class 3 facility with the highest accreditation for safety.

Liposuction, in any form, is considered a plastic surgery operation. At Carolina Coastal Plastic Surgery and Medical Spa, we are a teaching center for other plastic surgeons and cosmetic surgeons from the U.S. and Europe. We were chosen for this honor because of teaching credentials, large teaching certified surgery center, and the fact that we possess the first **Jewel Sciton Laser** that is able to deliver to patients, not only pro-lipo, but micro laser peels, pro fractional laser for the face and body, spider vein elimination, photo therapy (BRL- Broad hand light) for the skin, and "skin-tyte" which delivers firmer more youthful looking skin. The bottom line is... if you imagine it, we create it!
